

## HW: Early Intervention

### [Overview of Early Intervention](#)

1. Choose **one** key idea from the early intervention webpage and clearly explain how it connects to at least one topic we've already explored in class. Include a brief direct quote from the webpage (identify the section clearly since there are no page numbers) and explicitly mention the related class topic.

In the document it states, "Early identification of developmental delays or disabilities helps children receive services that are most beneficial to their specific needs as soon as possible" (Importance of Early Intervention). This really puts emphasis on providing services at the earliest possible stage to help children progress faster and more fluently than they would under their own power. This connects to our class because we had talked about IEPs and the process behind them. We had talked about that if there are signs to notice them and really pay attention to see if that student needs to go into that process to get the extra help they need.
